MOON PHASES

Four, with dates in your PDF

A note from Vela

AI

This is a month to let your light lead. Leo is fixed fire, steady and loyal, and ruled by the Sun itself. When the sky supports you, you shine without trying; when it slows down, it asks you to tend your inner flame. The month moves through four moon phases. Each one brings its own invitation for Leo energy, from planting a wish to celebrating what has grown. Light your candle or incense at each phase and use the prompts below.

New Moon: plant the seed

Phase: New Moon

Theme: fresh starts

A dark sky and a fresh page. This is the moment to name one wish for the month, something you would like to create, start or share. Keep it specific and heartfelt. Light your candle, write your wish on a slip of paper and tuck it beneath the holder. Notice how it feels to say it out loud.

First Quarter: take a bold step

Phase: First Quarter

Theme: action

Momentum gathers. Leo energy loves this phase: it rewards a little daring. Say yes to the plan that excites you, share the idea, send the message. If doubt arrives, it is often a sign you are growing. Choose one brave act this week and celebrate it, however small.

Full Moon: celebrate

Phase: Full Moon

Theme: light and gratitude

Your wish meets the light. Look back at the slip of paper beneath your candle. What has shifted, opened or begun? Leo knows how to celebrate; let yourself enjoy it. This is also a lovely night to cleanse crystals in moonlight and give thanks before you let the flame rest.

Last Quarter: rest and release

Phase: Last Quarter

Theme: letting go

The light wanes and so can your effort. Clear your altar, set aside anything you no longer wish to carry and give yourself an early night. Rest is not the opposite of shining. It is how the Sun rises again.

A candle ritual for Leo

Your zodiac candle

Paper and pen

A heatproof surface

10 minutes

- 1 Place your candle on a heatproof surface away from anything that could catch. Never leave it unattended.
- 2 Before lighting, hold the candle and think of one quality you admire in yourself. Say it aloud.
- 3 Light the wick and watch the flame for a full minute, breathing slowly.
- 4 Write your wish for this moon phase and read it to the flame.
- 5 Let it burn for at least an hour on its first lighting so it melts evenly, then snuff it out. Look for the gemstones as the wax melts over the coming weeks.

SAY IT ALOUD

I let my light be seen, and I let it rest when it needs to.

Your journal

What wish did I plant at the New Moon, in one sentence?

Where did I feel brave this month?

What am I ready to let go of before the next cycle begins?

To close

Your own forecast gives the real dates of each moon phase for the coming month, worked out from the live sky, and the ritual for your candle or incense.

Sources and small print

This is a sample written for a made-up chart: Leo Sun, Pisces Moon, Virgo Rising. Your own PDF is written for your chart. Sign, element, modality and ruler facts come from RoxyAPI's ephemeris; stones come from the Starsley crystal library, drawn from published crystal tradition. Moon phases are calculated from the live sky. Astrology for inspiration and entertainment.
